## **I. Importance & Safety**

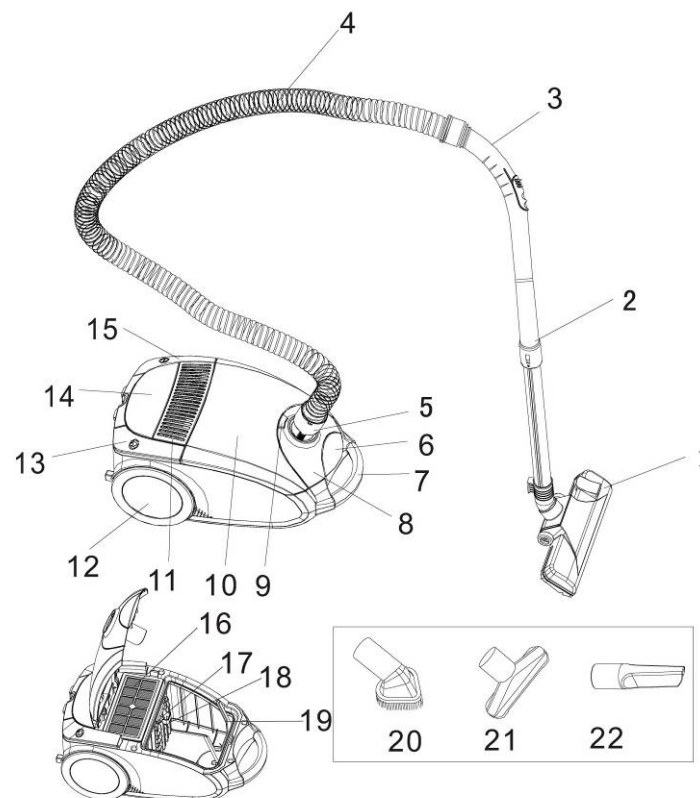

- Your vacuum cleaner is an electric appliance: it should be operated under normal conditions. Basic precautions should always be followed to reduce the risk of fire, electrical shock, and injury to person, including the following:
- Material listed as following should not be sucked in, otherwise it may damage the appliance (cause fire, or injury to persons).
  1. Hot material, such as ashes, flaming cigarette.
  2. Big piece of scraps, such as glass.
  3. Poison material (impregnant, corrosive), erosive material (acid material, detergent).
  4. Any flammable or volatile liquid as gasoline or alcohol goods.
- When not in used, cut off the power. Remove the plug from the wall socket before any service like clean, check or repair. Never switch off the appliances by pulling the plug.
- Avoid to pull or fold the hose, otherwise may cause deformation or damage.
- Make sure the rated voltage is conform with the supplied power.
- Do not let the power cord go through sharp material to avoid damage.
- Do not immerse the appliance into water, or never put the appliance directly in sun or near any heater or the like to avoid deforming of the plastic components or fire accident.
- Never move the appliances by pulling the power cord.
- Never let children play the appliance to avoid suddenness.
- Do not operate the vacuum cleaner if the appliance be drop down and operates abnormally obviously or the power cord is damaged. You should take the

appliance to the authorized maintenance store if happen conditions listed above.

- Never operate the appliance when the inlet has been blocked to avoid heat or deforming of the plastic component or damage of the motor. If the power cord is damaged, it should be replaced by the manufacture or its service agent in order to avoid a hazard.

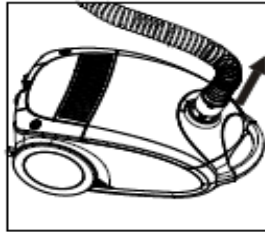

## II. Structure and Components

### A. Structure figure

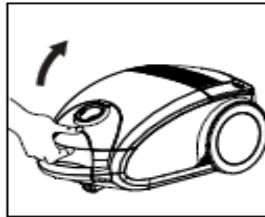

- |                 |                    |                       |
|-----------------|--------------------|-----------------------|
| 1. Floor nozzle | 2. Adjustable Tube | 3. Remote handle      |
| 4. Hose         | 5. Inhale plug     | 6. Front cover buckle |
| 7. Handle       | 8. Front cover     | 9. Inhale button      |

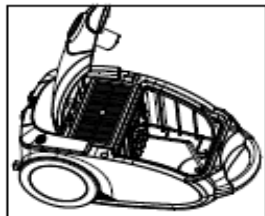

- |                        |                      |                    |
|------------------------|----------------------|--------------------|
| 10. Accessories cover  | 11. Wind outlet      | 12. Big wheel      |
| 13. Cord rewind button | 14. Indicator screen | 15. Power Switch   |
| 16. HEPA               | 17. Filter           | 18. Filter rack    |
| 19. Dust bag rack      | 20. Combined brush   | 21. Suction nozzle |
| 22. Crevice nozzle     |                      |                    |
- B. Operation Guidance
